ICE SCREEN

COUNTERS | POZZETTI GELATO

CiAm

Refrigeration solutions
with a design focus.

The Pozzetti Gelato IceScreen counter series consists of 6 linear modules, with 2 - 4 - 6 - 8 - 10 - 12 round tubs available with or without storage. Refrigeration is static with glycol, perfect for ensuring temperature uniformity for fast ice cream scooping for both upper round tubs and the lower ones. IceScreen pozzetti gelato feature tilting doors hinged in the top with soft-closing, equipped with integrated video walls in total black (RAL 9005) finish. Graphics and video communication can be customized via special web application, and data transfer is via USB flash drive. The built-in condensing unit is always with eco-friendly R290 gas; when remote FGas it used.

Ice-cream

ICE SCREEN

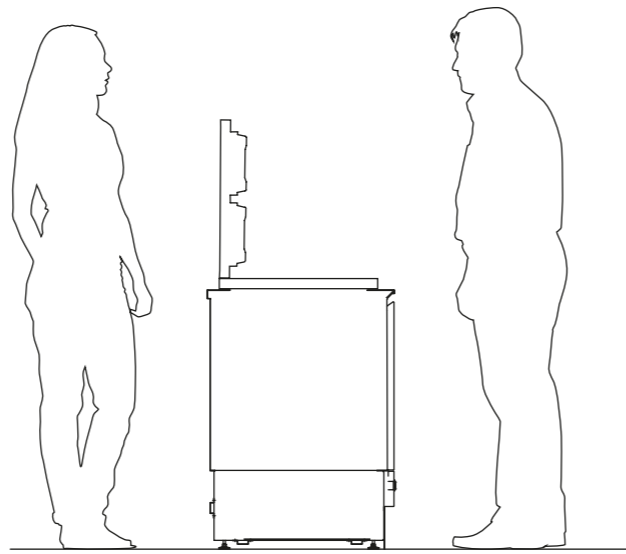

The new interactive dimension of the pozzetti gelato.

Watch the video

Pozzetti opening

Under the doors is located the glycol refrigerated pozzetto gelato with or without storage

It is possible to open the door manually, through the handle. The door features a soft-closing system.

IceScreen doors

IceScreen pozzetti gelato feature insulated tilting doors, hinged into the work surface with soft-closing. Through manual opening of the doors, the operator accesses the refrigerated round tubs. Video communication and graphic communication video walls are integrated with the doors in total black finish.

Ice Screen Display

Web app for content management

1. Create your flavors from PC or Smartphone

2. Transfer to USB stick

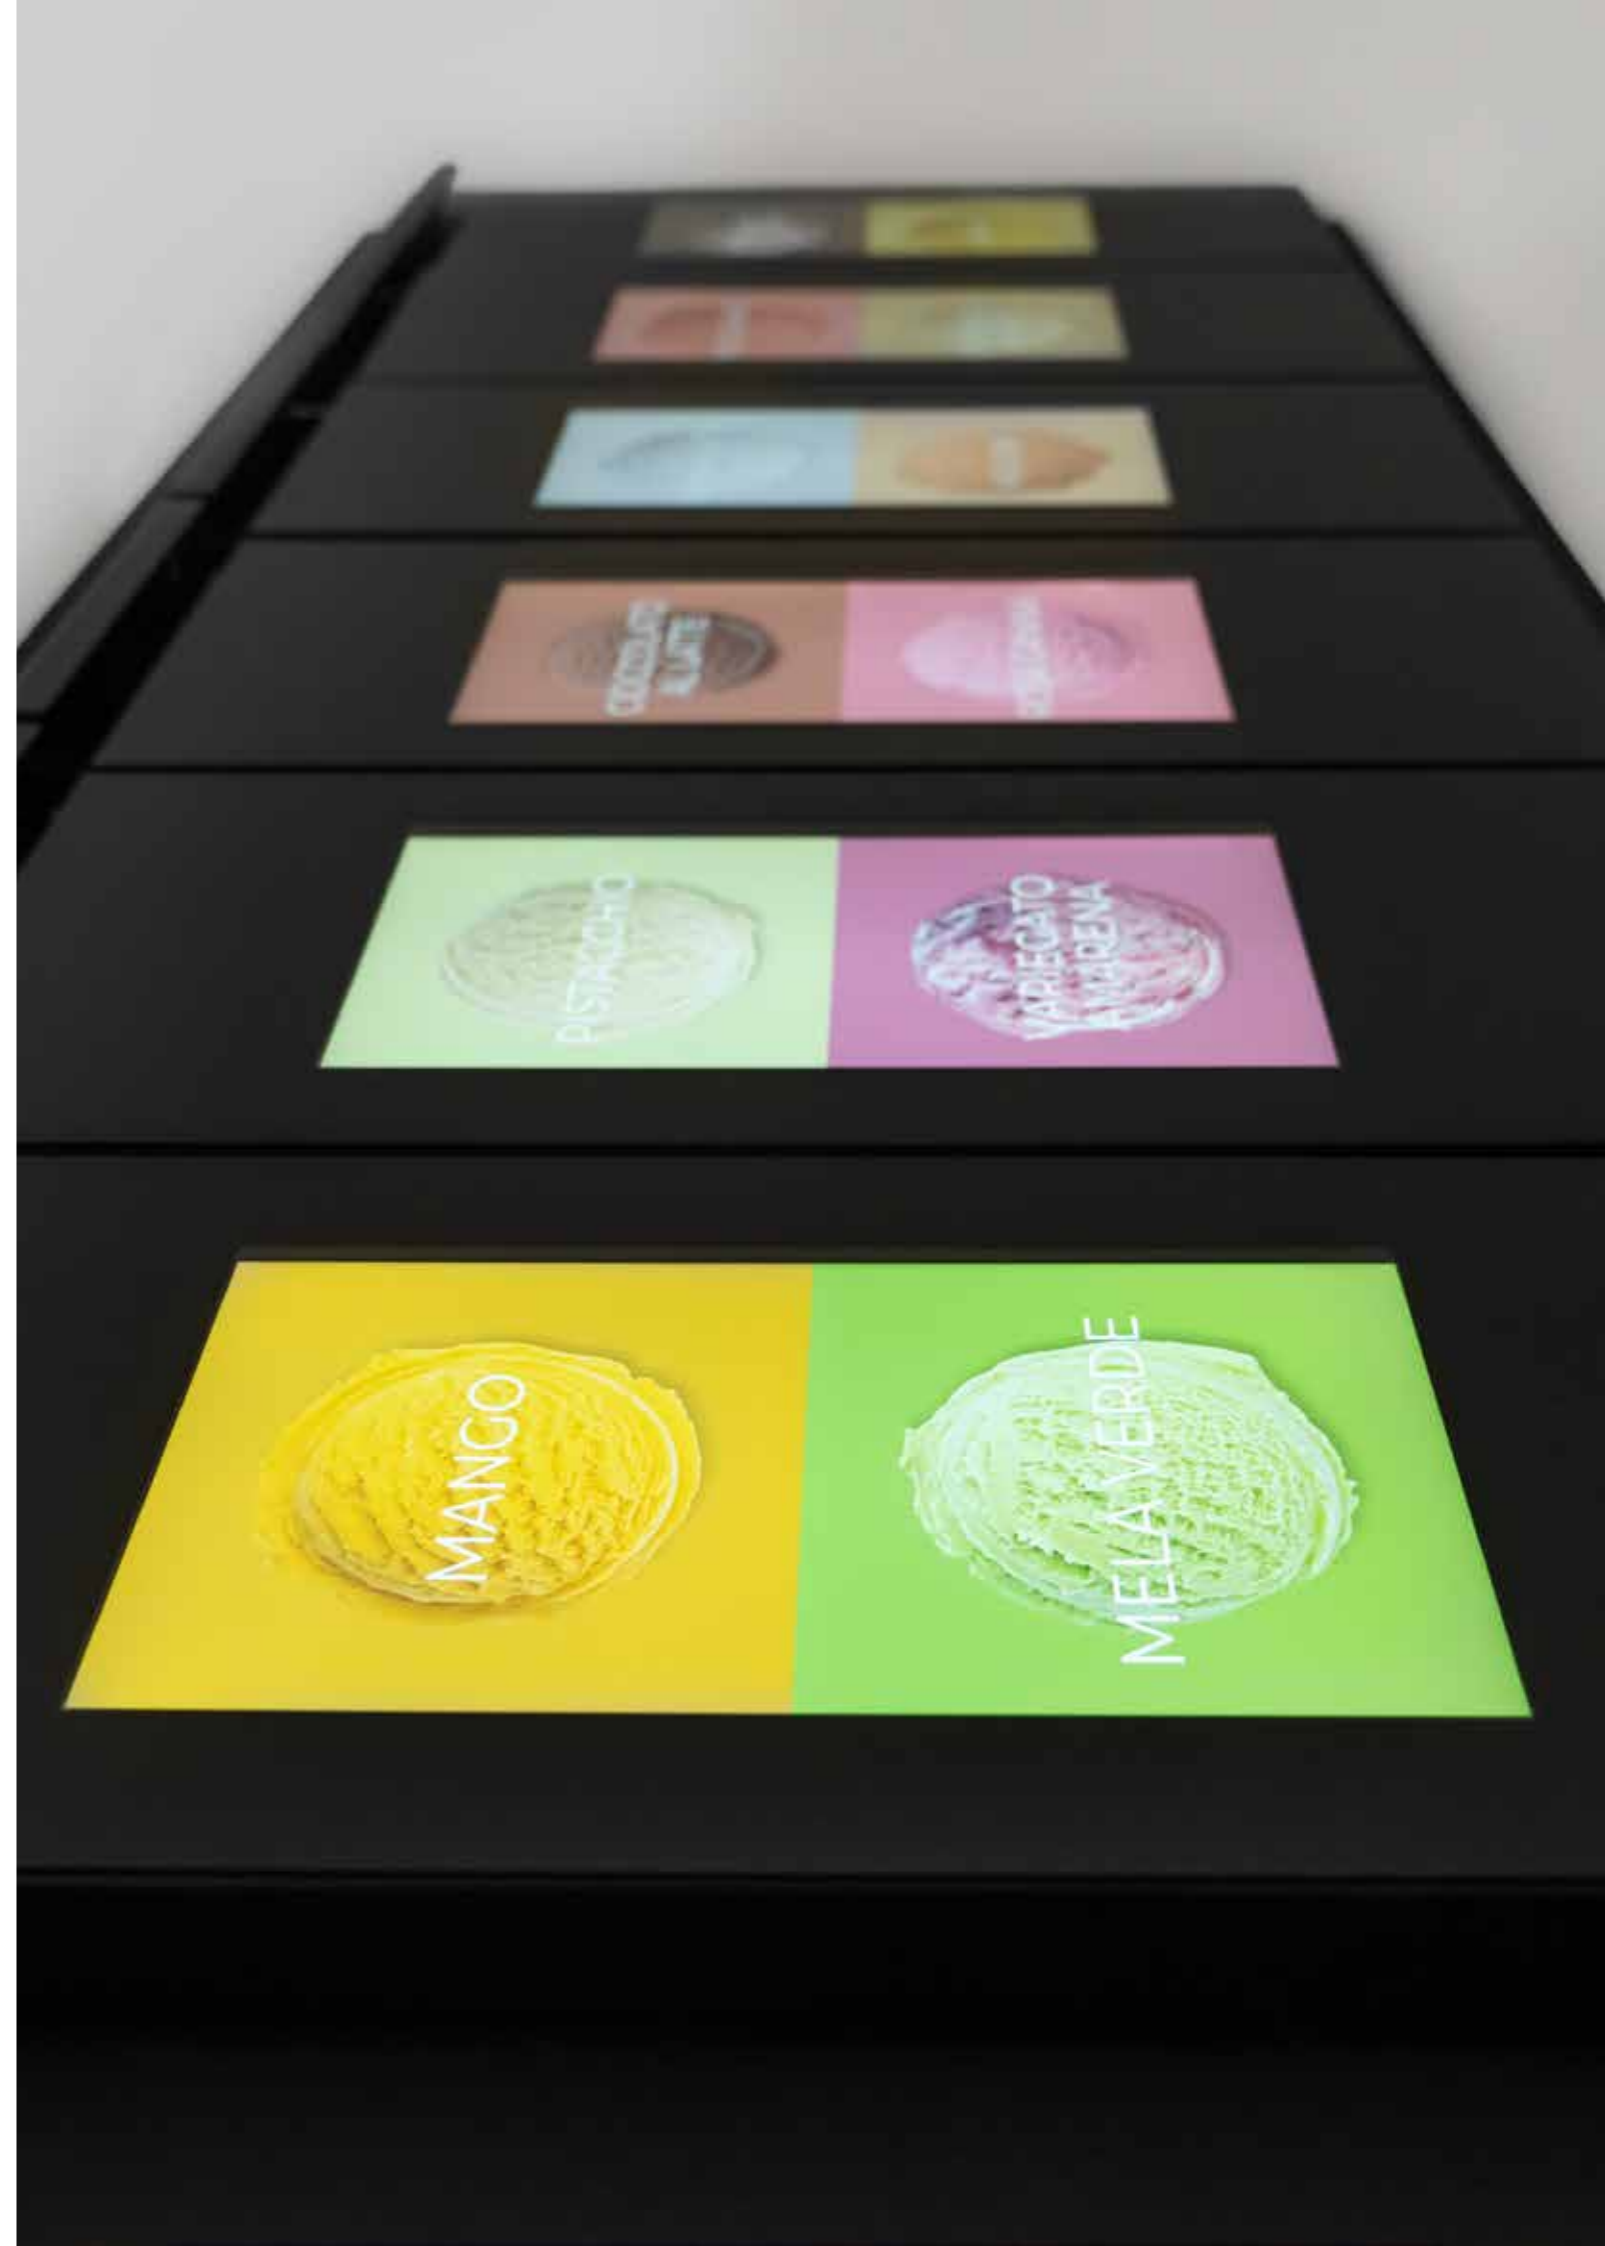

3. Upload the video to the display

USB flash drive input

Web application for content management

The user can customize the graphics of the ice cream flavors transmitted in the 13" video walls via a special web application; once the configuration is chosen, the user downloads the videos, which he or she then transfers to the monitors via a special USB stick

Refrigeration

Glycol Refrigeration

Static glycol refrigeration has the following advantages:

- perfect temperature uniformity between the upper and lower pans $\Delta T\ 1^{\circ}\text{C}$;
- Energy saving due to very low consumption;
- The glycol pozzetto never defrosts! It thus avoids thermal shock to the ice cream, which can be kept longer.

Ecological gas R290 for plug-in versions

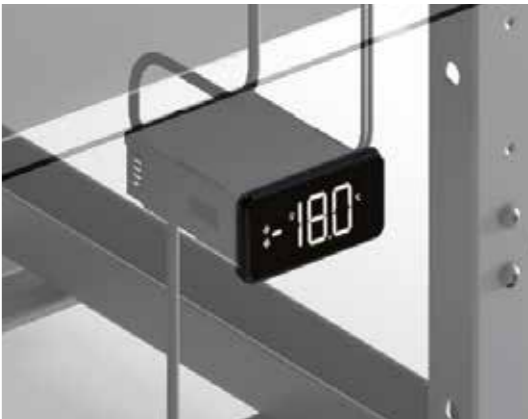

Built-in condensing unit with eco-friendly gas R290 integrated in the lower part of the basement, thus optimizing the usable space for inserting the pozzetto counter.

Energy saving

The glycol pozzetto is a great energy-saving product, in fact the compressor duty cycle is 15%, only 20 minutes in 2 hours! In addition, under favorable environmental conditions with low humidity, further energy saving can be achieved by turning off the electric heating around the rings.

Electronics

Pannello Touch

All glycol pozzetti counters are equipped as standard of the elegant touch control panel.

CIAM CONNECT

1. Connectivity

The device allows remote control of the showcase thanks to connectivity with a Sim card that does not require wi-fi or a connection to the premises data.

2. Remote control

Through the Cloud portal you can interact with the showcase, by downloading the operating graphics, monitoring alarms and product performance directly online.

Ciam Connect

Round tubs and slots

Insulated module, monolithic pozzetto with 70mm insulation made of ecological polyurethane.

Glycol Refilling

Insulated module

Monolithic pozzetto with 70mm insulation made of ecological polyurethane.

Glycol Refilling

The glycol liquid needs to be inserted into the pozzetto through the push-pull cap built into the top. The correct level is reached once the liquid drains out through the lower pipeline, which is equipped with a shut-off valve.

Round tubs and round tub slots

Stainless steel Round tubs diam.200mm H250mm (7Lt) with anti-rotation system on 2 points. Stainless steel slots with anti-rotation system on 4 points.

Upper ring of round tub slots

New plastic collar flush with the top and perfectly coplanar with the inner walls of the slot.

Lowered skirting for the condensing unit housing under the module

Skirting

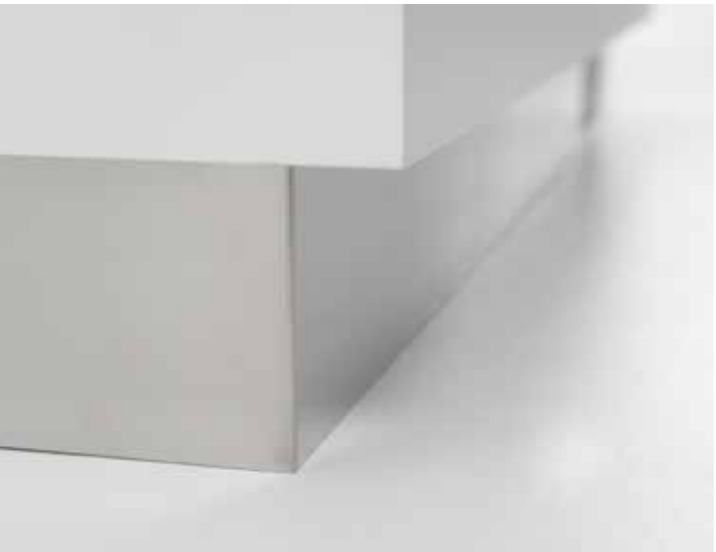

Lowered powder-coated steel skirting for the condensing unit housing.

Steel kick plate

A stainless steel kick plate can be applied upon request to finish the end of the horizontal profiles of the counter.

Kit of casters

Casters can be provided instead of feet upon request.

TECHNICAL FEATURES

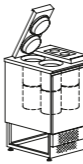

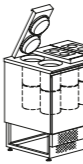

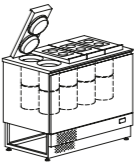

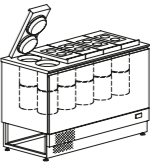

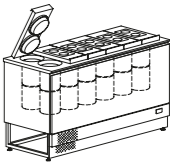

Glycol pozzetti gelato counter

Module lengths (N. Round tubs)	mm	400 (2) 650 (4) 900 (6) 1150 (8) 1400 (10) 1650 (12)
Depth	mm	660
Pozzetto heights	mm	618 with storage 370 without storage
Matching with Counters	-	Standard Compact Table
Round tub	mm Lt	Ø200 H250 inox 7
Counters	-	Up-and-over doors with integrated video walls soft-closing, black finish (Ral 9005)
Worktop	-	Satin Stainless steel (Std) Gres, acrylics, engineered stone, natural stones (Opt)
Refrigeration type	-	Static glycol
Operating Temperature Power supply	°C	-14 / -18
Power supply	(V/Ph/Hz)	230/1/50
No./Type Compressor	-	1 / Hermetic
Gas	-	R290 built-in comp./Fgas remote comp.
Defrosting	-	Absent
Climate Class	-	N.4 / U.R. 55%
