with a design focus.

# Ice Queen

The perfect combination of efficiency and design.

The IceQueen range professional showcases is composed of 3 linear modules, L1150, L1650, L2150, available in 3 heights in the versions with GS type tank (continuous steel display trays, in the gelato version modular removable plexiglass tray holders are inserted, in order to ensure full visibility of the ice cream) and BL tank (the gelato display cases have stainless steel display trays with double airflow refrigeration; in the pastry version, a selector switch can be used to adjust the refrigeration on one or more shelves, up to the total refrigeration of the display case).

IceQueen showcases are designed to be highly performing. The gelato showcases are equipped with semi-hermetic condensing units with reverse-cycle, ultra-rapid, programmed defrosting; all display cases for pastry maintain a perfectly balanced temperature.

Versatile character  
and standout performance.

# Refrigeration

Refrigeration at positive temperature and low temperature for ice-cream

Double airflow refrigeration for gelato showcases BL model

Double airflow refrigeration for gelato showcase GS model

**Refrigeration at positive temperature and low temperature for ice-cream**  
IceQueen showcases can be refrigerated at positive temperature (+4°) or low temperature (-18°) for ice-cream and semifreddi.

**Humidity control (Opt)**

On request it is possible to request humidity control, especially for pralines display.

**Larger evaporator**

All refrigeration coils are supplied oversized to have high moisture within the refrigerated area.

**Double airflow refrigeration**

All gelato showcases have double airflow refrigeration that guarantees perfect temperature balancing.

**Automatic electric defrosting (Opt)**

The refrigerated showcases at positive temperature are equipped with electric defrosting as standard.

**Reverse-cycle defrosting**

All low-temperature models have ultra-rapid reverse cycle defrosting as standard.

**Ventilated refrigeration adjustable on all shelves**

IceQueen showcases for pastry have a setting switch to adjust refrigeration on different shelves.

**Electronic valve (Opt)**

On request, it is possible to install the electronic thermostatic valve, especially in the case of connection to a cooling system.

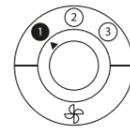

**Heated pan for evaporation of condensation water (Opt)**

The showcases can be equipped with a condensate evaporator pan with electric resistances, if it is not possible to connect the water drainage system to the room drainage system.

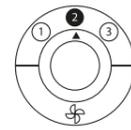

**Multix**

IceQueen showcases are compatible with Multix system.

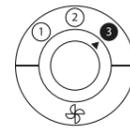

IceQueen showcase allows to set the refrigeration in three different ways:

1. Just on display area

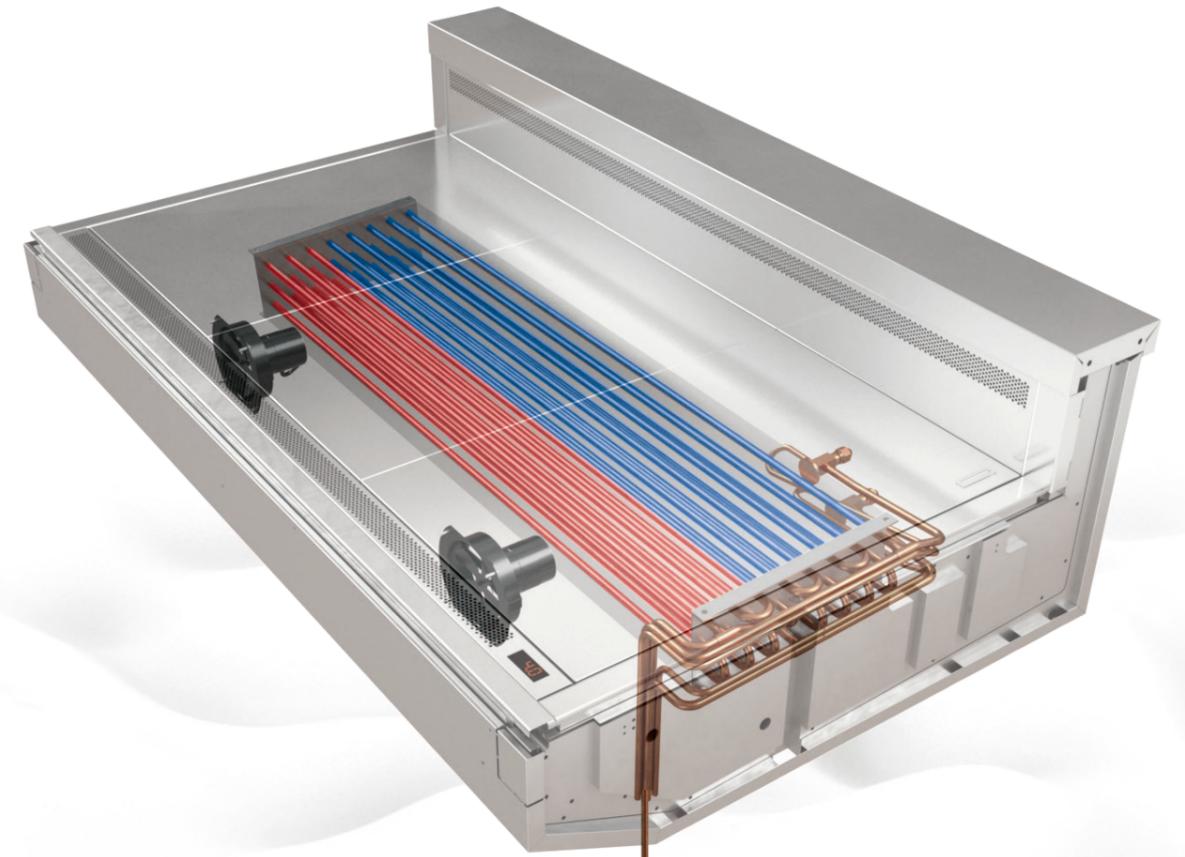

2. On display area and first shelf

3. Refrigeration on all display levels

# MULTIX. The new intelligent refrigeration system.

Thanks to a touch display it is possible to select four preset programs, or adjust the temperature and humidity according to requirements.

Multix is based on the use of inverter control units, in addition to hot gas injections for humidity control without using electric resistances.

Ventilated refrigeration adjustable on all display levels.

# Heated showcases

## Dry-warm showcases

Dry-warm showcases have a steel plate heated by electric resistances.

## Humid heat with induction (Opt.)

On request, the dry-warm cabinets can be equipped with a water pan loaded manually for the natural addition of humidification.

## Bain-marie warm showcases

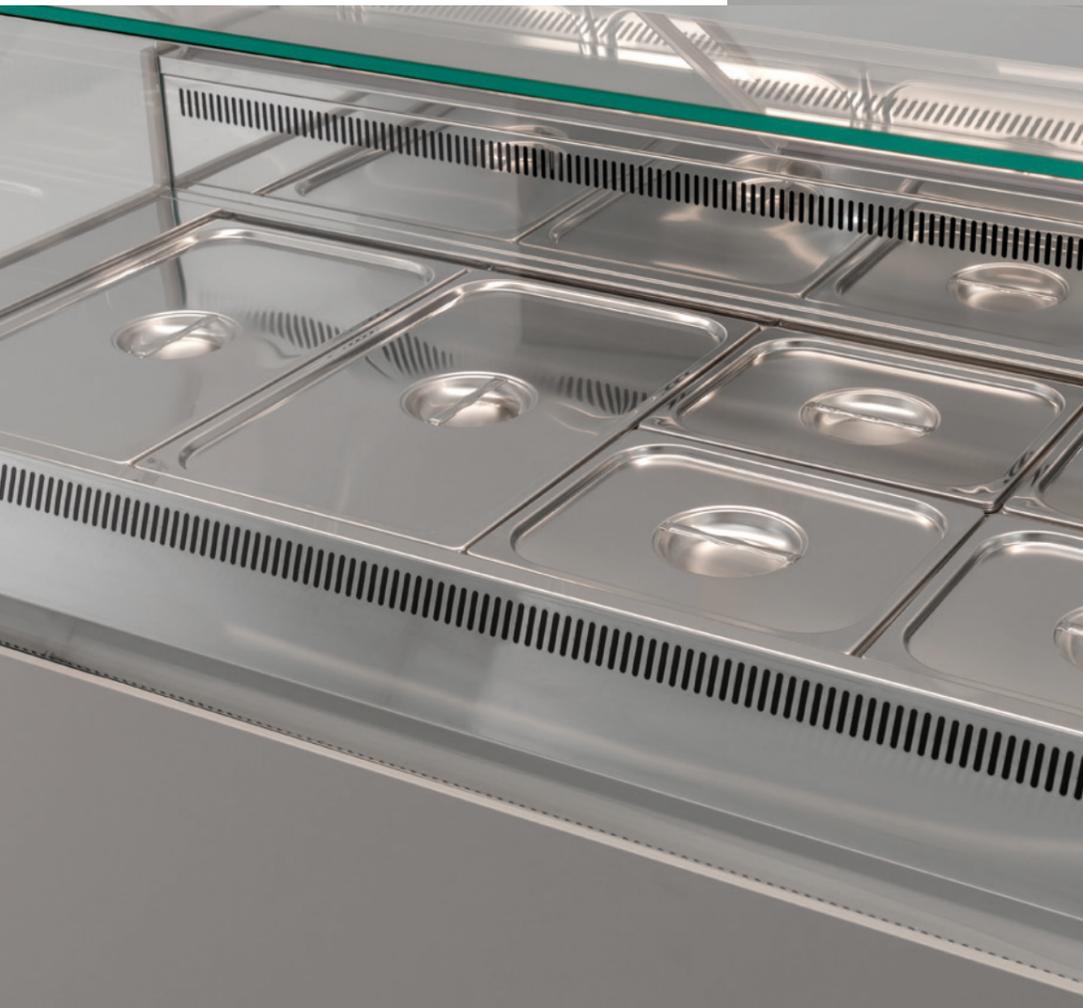

Bain-marie warm showcases have an internal tank with rounded internal edges and designed to house 1/1 gastronorm trays.

## Perforated trays (Opt)

On request, the bain-marie warm showcases can be equipped with perforated steel trays, instead of gastronorm trays.

## Heated shelf (Opt)

On request, the IceQueen showcases can be equipped with heated shelf in laminated glass.

Water pan loaded manually for the natural addition of humidification.

# Glass gantry

Lighting on each shelf

## Heated double-glazed glasses

The glass gantry is composed by heated double-glazing.

## Screen printing glasses

Standard mirror screen printing; the color of the screen printing can be customized on request (Opt).

## Upward-opening double-glazed glass

Upward-opening front glass through power-assisted system with gas pistons.

## Lighting on each shelf

Each shelf is illuminated with a 3000°K no-spot LED ceiling light.

## Profiles and mullions

Aluminum profiles and mullions are in polished finish; the finish can be customized on request (Opt).

## Sliding doors

Access to the refrigerated compartment is via PETG sliding doors with perimeter gaskets; on request it is possible to insert micro-fabric night blind instead of the sliding doors.

# Electronics

## CIAM CONNECT

### 1. Connectivity

The device allows remote control of the showcase thanks to connectivity with a Sim card that does not require wi-fi or a connection to the premises data.

### 2. Remote control

Through the Cloud portal you can interact with the showcase, by downloading the operating graphics, monitoring alarms and product performance directly online.

### Touch Panel

The elegant touch control panel is fitted as standard on all refrigerated modules.

### Low consumption electronic fans

Ventilated refrigerated showcases are equipped with low consumption electronic fans.

### High-efficiency fans

Ventilated refrigerated showcases are equipped with high-efficiency fans.

High-efficiency fans

Digital control panel

Digital temperature display

## Monolithic tanks

The monolithic tanks are insulated with water-based ecological polyurethane.

## Large exhibition space

IceQueen showcases are equipped with a lower display compartment, in order to have a large loading capacity.

## Backlit ice-cream flavor tags

The BL type ice cream display cases have the backlit ice-cream flavor tags as standard.

## Plexiglass removable pans holder

The IceQueen GS display cases are equipped with a removable plexiglass structure that can be used to hold transparent ice cream pans in a variety of sizes; when necessary, the structure can be used to display single portions or semifreddi, or, when removed, the display case can simply be transformed into a pastry display case.

Backlit ice-cream flavor tags

Channeling in continuity and paneling kit

## Channeling in continuity

The IceQueen showcases are designed to be channeled in continuity. This is possible even between showcases with different uses and temperatures.

## Paneling kit

On request, the showcases can be equipped with a front and side paneling in pure HPL or painted HPL.

## Customisation of colors and finishes (Opt)

On request, the internal part of the tank can be powder-coated in RAL colors chosen by the customer.

## Kit of carters

Kit of carters

**Plexiglass removable pans holder**

The IceQueen GS display cases are equipped with a removable plexiglass structure that can be used to hold transparent ice cream pans in a variety of sizes; when necessary, the structure can be used to display single portions or semifreddi, or, when removed, the display case can simply be transformed into a pastry display case.

**From gelato showcase to pastry showcase**

It is possible to easily turn a gelato showcase into a pastry showcase, removing the plexiglass structure.
